**3<sup>rd</sup> Mediterranean Conference of Neuroscience**  
**Alexandria, Egypt, 13-16 December 2009**

---

**The first two editions of the Mediterranean Conference of Neuroscience, the first held in Montpellier, France on 1997 and the second in Marrakech, Morocco on 2006, were a great success. Alexandria is now preparing herself to welcome the 3<sup>rd</sup> Mediterranean Conference of Neuroscience where she will gather neuroscientists from all over the world and especially from the Mediterranean area.**

**Meetings during this conference aim to assemble scientists interested in Neuroscience in a crossroad where they can exchange experience, information, and ideas in the fields of basic, clinical and applied Neuroscience. This conference will also allow the diffusion of updated advances in these fields through communication between experienced scientists and young researchers. Another important aspect of this colloquium will be to follow up the numerous partnerships born in the first two meetings and allow the creation of new ones between neuroscientists from south and north sides of the Mediterranean Sea.**

**The program will include symposia, oral presentations and posters covering various neuroscience fields in order to satisfy attending scientists both on the national and international levels.**

***Scientific Committee***

1. Prof. Mohamed Bennis : Cadi Ayyad University, Marrakech, Morocco
2. Prof. André Nieoullon : Mediterranean University, Marseille, France
3. Prof. Marc Landry : Bordeaux 2 University, Bordeaux, France
4. Guadalupe MENGOD, Consejo Superior de Investigaciones Cientificas, Barcelona, Spain
5. Prof. Marina Bentivoglio : Faculty of Medicine Strada Le Grazie 8, Verona, Italy
6. Dr. Mohamed Jaber : Cellular Physiology and Biology institute, CNRS UMR 6187, Poitiers University, France
7. Dr. Ben-Ari : Mediterranean Neurobiology Institute (INMED), Marseille, France
8. Dr. Driss Boussaoud: Cognitive Neuroscience Institute (INCM) – CNRS, Marseille, France
9. Prof. Gwendal Le Masson : Bordeaux CHU, INSERM U862, François Magendie Institute, Bordeaux, France
